

RE: Murobond Paints

THE HYDO MAJESTIC HOTEL.

The challenge of adding another layer of history to the iconic Hydro Majestic Hotel was not been taken lightly. A team of highly regarded heritage experts, architecture specialists and designers were enlisted to realise this vision, with particular weight being given to examining and respecting the Hydro Majestic's social history and heritage.

At CRD our team philosophy was mindful of the past but always had an eye to the future, to ensure the hotel continues to live well beyond current generations. Our designs chose to borrow from the existing structures, enhance the old and provide a feeling of total renewal.

The careful development of the right paint colours and finishes was a vital component of our design. Australia's Murobond paints were selected by CRD because of their fine reputation as a quality Australian brand – and their flexibility to work with us to create specially developed colours and tonal palettes to meet the varied and specialised period detail both inside and outside the hotel. From the subtle treatments of our period ceilings, to the bold magenta of Cat's Alley, every expectation was met in process that was a pleasure to work through.

The 1.27 km façade of the Hydro Majestic stands proud in 'Hydro Ivory' – developed by Murobond for us and widely acclaimed as 'the perfect' white' by the general public.

Well done Murobond and thank you for helping bring this famous Old Dame back to life in living colour with absolute style!

Peter Reeve
